Vd, , az --- am BIR are not all zero

for all i=1, 2 - .. m, since (Vi, y) = o(it)

[12, V1 + 2, V2 - · · 2, Vm] = = = = ai /1 Vil = = = ai >0

=) clim W = n2-n = ncn-1)

 $\langle a_i \nu_i + a_2 \nu_2 \rangle = \langle a_i \langle \nu_i, \nu_i \rangle$

then a := o for all i=1,2 -- m

Hence (VI, V2 -- , Vm) are L.I.

4 ye span { 7, , y -- 7m}

y = a, y, +2, y2 -- amym

obviously 0 & span (V, , VL - - vm)?

it follows that

if 11 = 2 diril = 0

a contradiction
